

DESIGN AND EVALUATION OF INNOVATION POLICIES IN LATIN AMERICA. INDICATORS OF PROGRESS

Buenos Aires, 4 - 7 December 2006.

Programme

Eighty seven senior researchers and policymakers from Argentina, Bolivia; Brazil; Colombia; Costa Rica; Cuba; Chile; Ecuador; Guatemala; México; Nicaragua; Peru; Uruguay and Venezuela attended the UNU-MERIT/RICYT/UNQ training workshop named "Design and Evaluation of Innovation Policy in Latin America. Indicators of Progress" held in Buenos Aires, Argentina from 4-7 December. This workshop provided the opportunity to exchange perspectives and experiences and recommendations arising from the specific European and Latin American experiences.

Supported by the Argentinean National Secretary of Science, Technology and Productive Innovation, this course was the first time that the course was held and specifically designed for Latin America. In this way, the DEIP alumni have climbed to more than 300 DEIP in almost 50 countries around the world, becoming an important repository of 'best practice' in adapting innovation policies to the political, social and economic realities of developing countries.

- ✓ The workshop gathered eighty seven participants coming from ten different provinces in Argentina and thirteen different countries in Latin America. The attendants represented public organizations (national, regional and subnational) institutions, universities, and science, technology and innovation institutions
- ✓ The professors came from UNU-MERIT, from academic institutions in Argentina and Latin America, among others: Centro REDES, UNQ, UBA y CONICET from Argentina; Universidad del Rosario (Colombia); Universidad de Chile; and RICYT.
- ✓ The covered topics included: processes and innovation systems in developing countries; regulation and impact of the intellectual property rights (IPR); human resources indicators; industrial and regional clusters and the interpretation of science, technology and innovation indicators.
